### STAGE 1

#### POWER

**450 → 500** hp  
**+50 hp**

#### TORQUE

**550 → 680** nm  
**+130 nm**

### WHAT WE WILL DO

We will carry out a custom software calibration (remap), developed and tested for your BMW M3. The work includes a full diagnostic health check before and after installation, a backup of your original engine software, installation of the new calibration via the OBD port or bench connection where required, and road testing to verify the results.
